

Cynthia Y. Henderson, Assistant Principal Administration

I am proud to be a member of the Herndon Family. I have worked in public education for over 30 years. Today I am part of a family of educators that are more than coworkers. We're committed to being a team that provides quality education, sets high expectations while creating a caring and stimulating environment for students, faculty and staff. For me, answering the call of reassignment to Herndon Magnet has brought great insight. I believe that Children of all races and income levels can meet high academic standards. I hope that sharing the love I've found in helping children will inspire a new generation of children to put their heart and soul into becoming the very best student that they can be. I have served in numerous volunteer leadership capacities but none has been as fulfilling as the 28 years I served as Science Teacher and Coach. Please know, that it is my pleasure and honor to serve children and to be a part of the Herndon family.
